

## Wavefunction License Update Procedure

Screen captures are from **Windows** – however the directions are **platform agnostic**. On the computer running an existing license of Wavefunction Software, download the latest **Spartan** or **Odyssey** installer/disk image/bundle (.exe/.dmg/.tar) from: [Wavefunction Downloads Page](#).

(Windows). Double-click on the **installer.exe** (for example, the Spartan24Installer130.exe) and follow the prompts to complete installation.

(Macintosh). Open the disk image (.dmg) and drag the program to the provided **Applications** folder (shortcut).

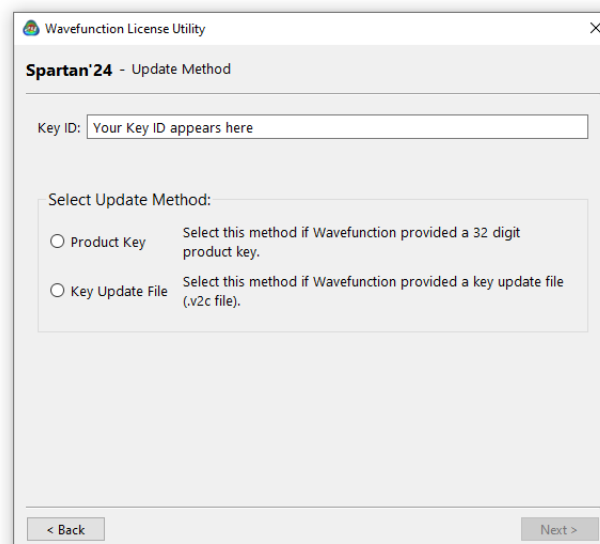

Minor point updates (for example, **Spartan'24 1.2.0** to **1.3.0**) do NOT require an update to the license, however a NEW version of the Sentinel Runtime (license manager) program will attempt to install, please allow this.

If you have an active older Spartan version licensed, or if your current license term has expired, Upon initially opening the application you will likely be prompted to launch the **License Utility**:

If your Spartan licenses is current, and you wish to update the license terms, manually launch the **License Utility** from the **Help** menu).

Typically, the previous license is recognized, and the **Update Method** panel is presented. Choose either **Product Key** or **Key Update File** and click the **Next** button. Follow the prompts to update:

**Note:** If your license manager (Thales: Sentinel Runtime Environment) needs updating, the installer or license utility may present you with the Sentinel Runtime Installation Wizard (by Thales). If this happens, follow the prompts to install the latest license manager software as well. Upon completion, in the case of a **Product Key** update, please **copy/paste** your **Product Key** into the provided field and **click** the **Activate** button:

The screenshot shows a window titled "Wavefunction License Utility" with a sub-header "Spartan - Activate Individual License". It contains a text prompt "Enter Product Key:" followed by a description: "A product key consists of 32 hexadecimal numbers (valid characters 0-9 and a-f) and will have form...". Below this is a placeholder for the product key: "XXXXXXXX-XXXX-XXXX-XXXX-XXXXXXXXXXXX". There is a large empty text box for entering the key. At the bottom, there is a checkbox labeled "Select 'Offline' if this computer cannot directly access the internet." and three buttons: "< Back", "Offline", and "Activate".

In the case of the **Key Update**, **Browse** to, **Open** and **Apply** your provided **Key Update File**. Upon applying the **Key Update File**, you will be prompted to **Generate** a **Confirmation Request** file, please do so and **email** this to us at your convenience via [codes@wavefun.com](mailto:codes@wavefun.com):

The screenshot shows a window titled "Wavefunction License Utility" with a sub-header "Spartan - Update Individual License". It contains a text prompt "Key ID:" followed by a placeholder: "your key id appears here". Below this is a text prompt: "Use the 'Browse...' button below to locate the key update file (\*.v2c) Wavefunction sent you." followed by a text box and a "Browse..." button. At the bottom, there is a text prompt: "Click the 'Apply' button below to install the key update." and two buttons: "< Back" and "Apply".

Once updated (with either method), click the **Done** button.
