

Windows License Update Procedure

On the computer acting as your network license server, open the Wavefunction License Server Control program:

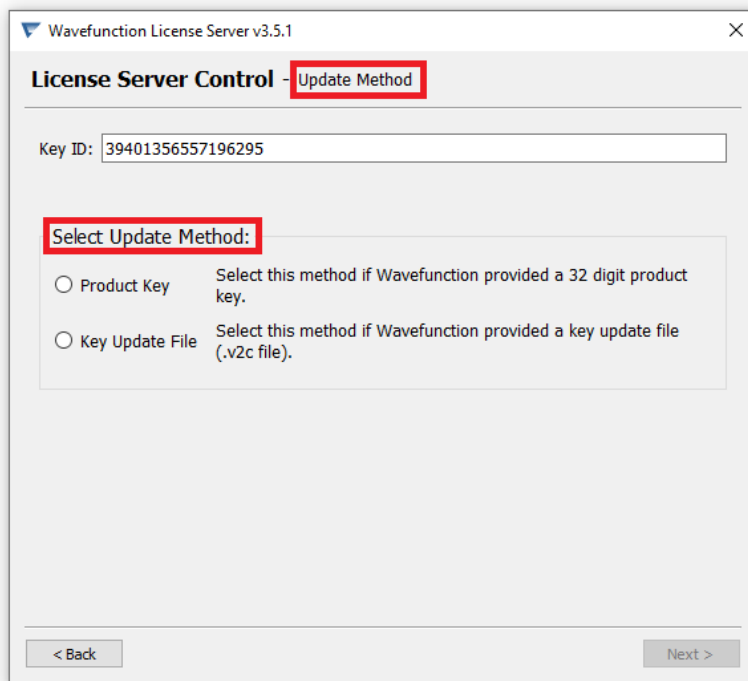

Please note, we recommend that you download and install the latest License Server Control Available, you can check your version number against the very latest available from the link: <https://www.wavefun.com/downloads>

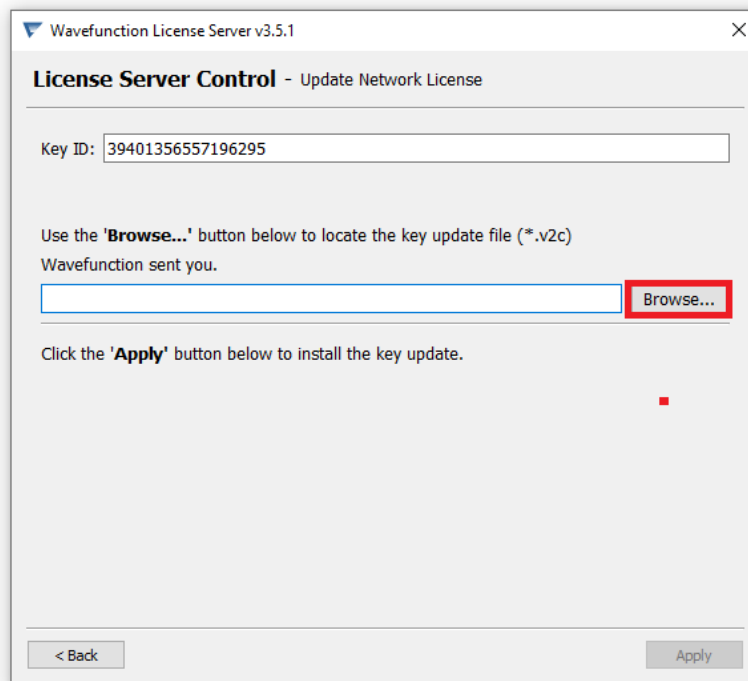

Your current licensing will be recognized and you will be presented with a summary of this. . . Click on the **Update** button:

This will present the **Update** Method panel of the **License Server Control**. Select your **Update Method**. Choose either **Product Key** or **Key Update File** (if **Key Update File**, make sure the **Key ID** in the license utility matches the **Key ID** in the name of the **Key Update File**), and click the **Next** button (lower right). Follow the prompts to complete the license update:

In the case of **Key Update File**, **Browse** to, **Open** and **Apply** your provided **Key Update File**. Upon applying the **Key Update File**, you will be prompted to **Generate** a **Confirmation Request** file, please do so and email this to us at your convenience via codes@wavefun.com:

Once updated (with either method), click the **Done** button.
Contact support@wavefun.com with any issues or questions.
