

GENERAL CHEMISTRY...MOLECULAR SCIENCE...STEM EDUCATION

# ODYSSEY

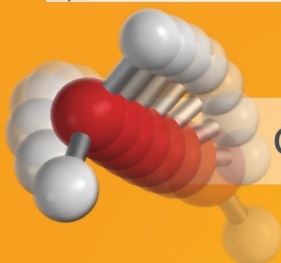

Molecular Explorer

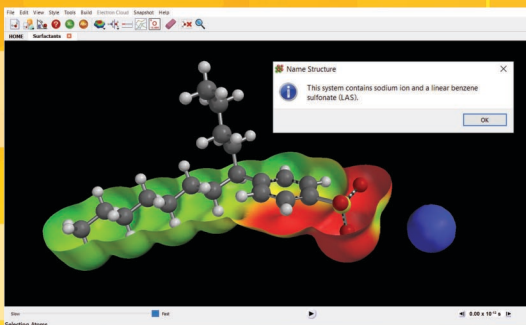

World-Class  
3D Visualization

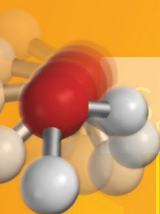

Compelling Dynamic Simulations

Modern Scientific  
Computation

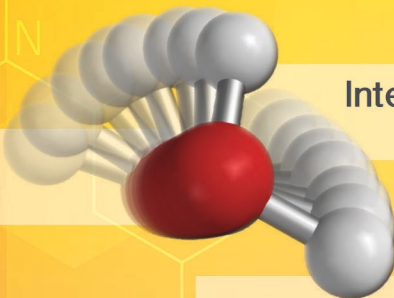

Models That Are  
Explorable...Always

Integrated Teaching  
Content

Thousands of  
Pre-Built Models

Easy Building of New Models

Available for Windows and macOS

# ODYSSEY

Molecular Explorer

Model kits for all kinds of molecular systems

Chemical bonding and intermolecular forces

Vast library of prebuilt models

Kinetic molecular theory and gases/liquids/solids

Demonstrations of molecular concepts

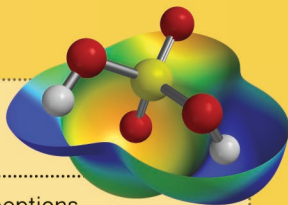

Solutions and chemical reactions

Guided labs with integrated assessment questions

Organic chemistry and biomolecules

Applications in the materials and life sciences

...and more!

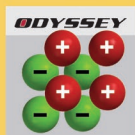

Available as **Instructor's Edition** and **Student Edition**  
(same compute capability and same content)

**Instructor's Edition** Only: Answer Key, Lists of Misconceptions,  
Customization of Questions, Standards Alignments (for Secondary School Use)

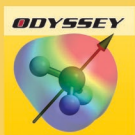

*iPad Apps (Available in the App Store)*

## ODYSSEY

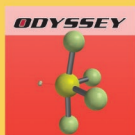

For the iPad

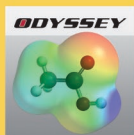

Ionic Bonding

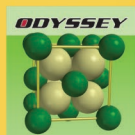

Polar Bonds and Molecules

VSEPR Theory

Functional Groups

Ionic Solids

...and 10 other iPad apps
