

Download and Installation Instructions for: Spartan Spectra and Properties Database (SSPD)

Windows:

Download the Windows [SSPD](#) (23.2 GB zipped directory)

This will take some time (less than an hour with a reasonable connection).

Right-click on the zipped folder and **unzip/extract** the folder: SSPDV500

Open the folder and **double-click** on the **SSPDV500Setup.exe**

Agree to the license terms and follow the prompts to complete installation.

Once completed, you may **delete** both the zipped and unzipped folders from your machine.

Open **Spartan'20 Parallel Suite**. Go to **Options** menu > **Preferences** >

Databases tab. In the **SSPD/SIRD** section (at top), click the **Reset** button.

Check the **Reload** box, and click **OK**. Once the reload has completed you can use **Spartan** to access the **SSPD**.

Macintosh:

Download the Macintosh [SSPD](#) (23.2 GB disk image)

This will take some time (less than an hour with a reasonable connection).

Open the disk image. **Double-click** on the **SSPD Installer**. **Agree** to the license agreement and follow the prompts. The installer will copy the **SSPD** to the appropriate location in the **Spartan** application bundle.

Open **Spartan'20 Parallel Suite**. Go to **Options** menu > **Preferences** >

Databases tab. In the **SSPD/SIRD** section (at top), click the **Reset** button.

Check the **Reload** box, and click **OK**. Once the reload has completed you can use **Spartan** to access the **SSPD**.

The **SSPD** is also available on a 32 GB flash drive.
